The FIXEDFLO[®] Advantage

The FIXEDFLO[®] is the first and only high-efficiency faucet (HEF) system providing ultimate water savings through non-adjustable or "fixed" water flow. The FIXEDFLO[®] sensor faucet system does not use a typical diaphragm. Instead a uniquely designed internal water flow mechanism allows the faucet to stream at a pre-set flow rate that cannot be externally altered even by the use or replacement of an aerator. The FIXEDFLO[®] sensor faucet system is available in 0.35gpm and 0.5gpm water flow rates. The FIXEDFLO[®] line is ideal for all public facilities where water conservation is a priority.

The unique design of the FIXEDFLO[®] sensor faucet system allows for the use of various power options including battery power, electrical power (with battery back-up), or an environmentally friendly hydro-generator.
