FOR IMMEDIATE RELEASE

HYBRIDFLO® Model AEF-301 Automatic Faucet System Now Includes the Patented BRV® Mechanism

WOODLAND HILLS, CA (April 2007) - The AMTC HYBRIDFLO® Model AEF-301 Automatic Faucet System has been upgraded to include the patented BRV® mechanism with cam gear motor drive. The use of a cam gear motor drive greatly reduces down time caused by faulty solenoids. The system has been successfully tested over 5 million cycles.

About AMTC

AMTC is a leading manufacturer of advanced plumbing systems and water conservation devices for commercial applications. The company specializes in “touch-free” electronic flush valves, urinal and commercial toilet systems, electronic faucet systems, and electronic soap dispenser systems. All of AMTC’s electronic plumbing systems utilize its proprietary Micro-Cam Technology as a more reliable alternative to solenoid technology usually found in most competitor systems.
