FOR IMMEDIATE RELEASE

AMTC Products Win Prestigious 2008 ADEX Awards

WOODLAND HILLS, CA (April 2008) - ADEX is the largest and most prestigious awards program for product design of furniture, fixtures and finishes marketed to the design trade. Design Journal, the international trade publication for interior designers, architects and facility managers, sponsors the ADEX Awards. Judging is conducted by an anonymous panel of professionals, who judge entries in their respective areas of expertise.

The 2007-2008 ADEX Awards competition was the most hotly contested in the last 13 years with over 300 companies entering more than 1,200 products for consideration. Products are placed in Platinum, Gold, or Silver award levels based on the number of overall points the judges rate them.

AMTC's HYBRIDFLO® Model AEF-301 Automatic Faucet System was awarded the Platinum Award for its unique design and innovative motor drive mechanism. The HYBRIDFLUSH® Model AEF-801 Automatic/Manual Flush Valve System was awarded the Gold Award for its Hybrid design and superior reliability. Both products won their respective awards in the Commercial Plumbing & Fixtures category.

About AMTC

AMTC is a leading manufacturer of advanced plumbing systems and water conservation devices for commercial applications. The company specializes in "touch-free" electronic flush valves, urinal and commercial toilet systems, electronic faucet systems, and electronic soap dispenser systems. All of AMTC's electronic plumbing systems utilize its proprietary Micro-Cam Technology as a more reliable alternative to solenoid technology usually found in most competitor systems.
