

# LIQUIDFLO™

## AUTOMATIC LIQUID SOAP DISPENSER SYSTEM

**NEW!**

Model: ASD-400

The LIQUIDFLO™ automatic liquid soap dispenser system is the most efficient and cost-effective non-proprietary universal refill liquid soap system on the market. The spout is built of high quality solid polished brass. Its unique design allows for easy installation and conceals all mechanical and electrical components within the dispensing head. A universal refillable soap container makes the LIQUIDFLO™ ideal and economical for any application.

### SYSTEM BENEFITS:

- Eliminates the need for expensive proprietary cartridge refills, thus reducing post-consumer waste by as much as 57%.
- Dispenses economical non-proprietary liquid soap refills available on the open market. Provides savings of 80% or more versus proprietary cartridges. Return on investment (ROI) averages one (1) year.
- Non-proprietary universal refillable liquid soap bottle
- Ideal counter mount system dispenses rich liquid soap
- Easy to install and maintain
- Battery operated or AC power options
- Chrome plated solid brass spout designed to withstand vandalism

### SYSTEM SPECIFICATIONS:

- Touch-free system reduces the risk of cross contamination
- Universally refillable liquid soap container (800ml/27Fl. Oz.)
- Dispenses 0.8ml of rich liquid soap per dose
- 1,000 hand washes per 800ml bottle
